INTRODUCTION

USAID PEEP in collaboration with L&DDD has launched herdbooks for the first time ever in Pakistan for implementing the Punjab Livestock Breeding Act 2014. Herdbooks are a recordkeeping mechanism for tracking the health and productivity indicators of livestock. This recordkeeping facilitates selective breeding for the purpose of improving specific physical characteristics, and the quality of meat and milk. It not only leads to higher income for farmers through better milk and meat production, but also maintains the record of the animal's pedigree, which determines its fair price and can be utilized for maintaining or modifying the breed across multiple generations.

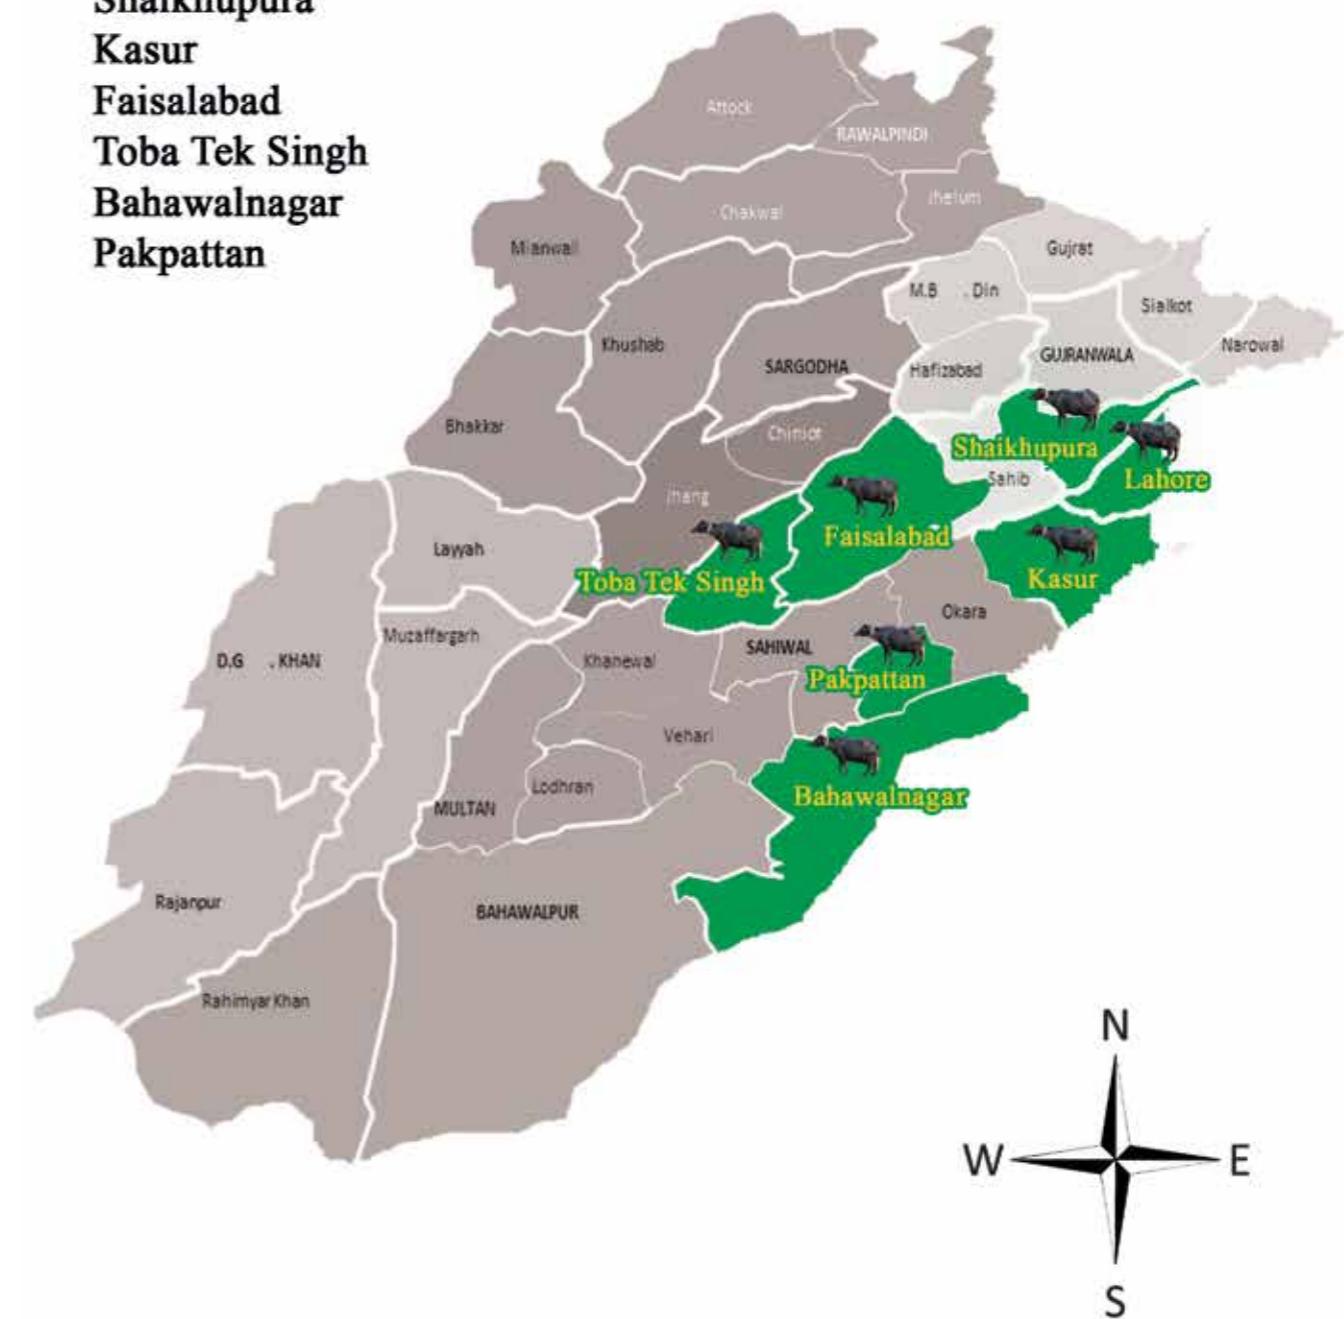

This herdbook records the performance of Nili Ravi buffalo being reared by members of the Buffalo Breeders Association, Punjab, Pakistan (BBAPP). It details the lactation periods, dates of calving, milk yield, and feeding and watering conditions of cows. Details of bulls utilized for breeding, and sex of the resulting offspring are also recorded for comparing breeding results.

Nili Ravi buffalo, the 'black gold' of Punjab is a prized breed. Its home tract is across the plains of Sutlej and Ravi rivers which include Lahore, Kasur, Sheikhupura, Faisalabad, Toba Tek Singh, Okara, Pakpattan, Sahiwal, Multan, and parts of Bahawalnagar districts of Punjab.

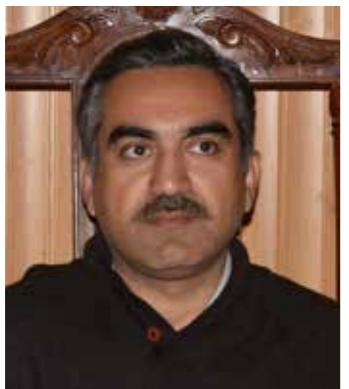

Nili Ravi buffaloes are massive, wedge-shaped animals. They are mostly black, but can also be found in brown, and often have white markings on their forehead, face, muzzle, and lower parts of the legs. The tail switch is often white. They possess medium, well-set head with small active walled eyes and curved horns. The neck is long and thin in females, but thick and powerful in males. The legs are comparatively short with strong bones. They have large and well-developed udder. Milk yield is up to 2,500 liters per lactation, with 6.5% butter fat. The tail is long that goes up to fetlock or just below, and often has a white tuft of hair which may touch the ground.

MESSAGE

The publication of this Herdbook is a leap towards breed improvement of the Nili Ravi buffalo in Punjab. Being iconic to Punjab's livestock and dairy sector, the Nili Ravi buffalo has been a backbone to Punjab's economy and a source of livelihood and nutrition of its hardworking inhabitants. The government holds its commitment to improving the lives of our people, and improving this breed is a significant step in that direction. I commend Buffalo Breeders Association, Punjab, Pakistan (BBAPP), for this achievement in partnership with USAID Punjab Enabling Environment Project (PEEP).

Sardar Husnain Bahadur Dareshek
Minister
Livestock & Dairy Development Department
Government of the Punjab

MESSAGE

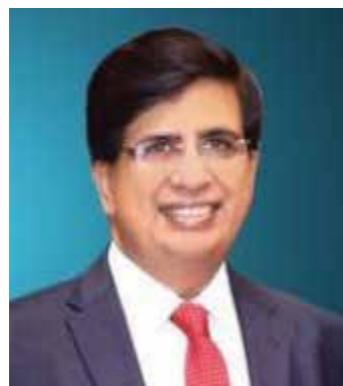

It is a source of immense pleasure that **Buffalo Breeders Association Punjab Pakistan** (BBAPP), in partnership with USAID Punjab Enabling Environment Project (PEEP), has taken the initiative to publish this Herdbook which contains valuable animal data, fulfilling a key deliverable under the Punjab Livestock Breeding Act, 2014. In the Livestock sector, we are endeavoring to create enabling environment for making livestock a source of social security, poverty alleviation, and rural development.

This Herdbook is a significant step towards ensuring the data compilation on pedigree and performance traits of the Nili Ravi buffalo. The maintenance of animal records of such a wonderful breed at breeders' level will be useful to all the farmers, and the sector stakeholders, as it will help them in identification of elite animals and traceability thereof.

Muhammad Ahsan Waheed
Secretary
Livestock & Dairy Development Department
Government of the Punjab

MESSAGE

Buffalo has been an integral part of livestock agriculture in this region for over 5000 years producing draft power, milk, meat and hides.

Buffaloes contributes 62% of milk and 50% of beef in the country. Buffalo milk is healthy as it is richer in saturated fatty acids. Its much higher total solids (18-23% vs 13-16%) is useful for making cheese, butter fat, several kinds of traditional sweets and ice creams.

The buffalo milk contains 58% higher calcium, 40% more protein and 43% less cholesterol than cow's milk. Buffalo milk also contains high levels of the natural antioxidant tocopherol. The peroxidate activity is normally 2-4 times that of cow's milk. Buffalo meat is lean, tasty and contains low cholesterol and is therefore healthier to consume than beef. It contains lower saturated fat than beef, which is a good dietary value. Buffalo meat contains 40% less cholesterol, 55% less calories, 11% more protein and 10% more minerals in comparison to bovine meat.

We have variability in the genetic potential of this important animal, some animals produce more than 20 litres of milk a day and some are producing 7 litres a day. For genetic improvement and production of progeny tested bulls, it is highly important to have recorded buffalo bull mothers to produce high genetic bulls.

The efforts of Buffalo Breeders Association, Punjab, Pakistan (BBAPP) with support of USAID PEEP and Buffalo Research Institute, Pattoki to develop this herdbook and pool of recorded buffalo bull mothers is highly appreciated for genetic upgradation of Nili Ravi Buffaloes of Punjab.

I congratulate the teams of all participating institutions on achieving this milestone which will have lasting impact on the animal farming communities by producing superior animals.

Prof. Dr. Talat Naseer Pasha, S.I.
Vice Chancellor
University of Veterinary & Animal Sciences
Lahore

MESSAGE

The foundation stone of the 5,000 year old Indus Valley civilization has been livestock and the water buffalo has functioned as figurehead, symbol, and driver of technological improvements providing fertilizer as well as energy for moving agricultural devices for plantation and transport and most of all, an unmatched source of nutrition. The plethora of engagements of the buffalo in the daily life of the people of the Indus Valley is evidence that the prosperity and progress of the people of our

nation will go hand in hand with the promotion and protection of this veritable 'Black Gold'.

No other animal, much less a crop, provides a near-complete solution of nutrition. From meat to milk and milk products, the water-buffalo is an organic factory, capable of helping to overcome the prevalence of stunted growth among Pakistan's children.

While the benefits of the water-buffalo have been highlighted time and again, what is critical at this juncture is to set the benchmarks and baseline metrics of today from which future progress of the development of the buffalo herds can be measured. The initiative to create the buffalo herdbook has finally borne fruit and our policy makers and researchers can build upon this compilation. The buffalo breeds of Pakistan, their population, their genetics and health management practices require focused policies and funds. The overall development of the buffalo breeds of our region is something our governments and people are obligated to perform in return for what the buffalo has been blessing us with since time immemorial.

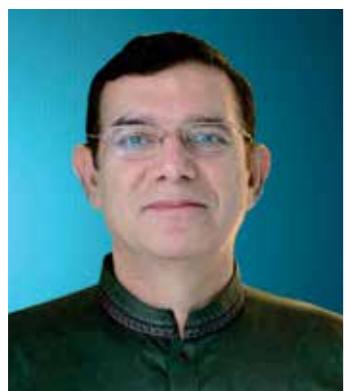

Mian Saeed Hassan Hotiana

President

Buffalo Breeders Association Punjab Pakistan

Pictorial Working History of Herdbook (BBAPP)

MESSAGE

It is a matter of great pride for us that for the first time at the national level, the development of Livestock Herdbook has enabled the implementation of Punjab Livestock Breeding Act 2014, which has been a result of the mutual efforts by Livestock and Dairy Development Department (L&DDD), Livestock Breeders Associations, and USAID Punjab Enabling Environment Project (PEEP). The development of Herdbook will help the livestock breeders and farmers assess the production potential of livestock breeds and enable them to undertake breed improvement practices. This will help the farmers fetch better prices for their animals. The Herdbook will also help address the issue of animal traceability which has remained a major hurdle in livestock herd management. USAID PEEP is proud to be working with all the relevant stakeholders and intends to continue its efforts for livestock sector development. This collaborative initiative by USAID PEEP will help mobilize investment in livestock sector leading to improved livelihoods and income generation opportunities for livestock farmers.

Buffalo Detail

Adults	Heifers	Calves	Bull	Total
40	18	32	3	93

Star Marked And changed colour is current practice of farmer from below Table

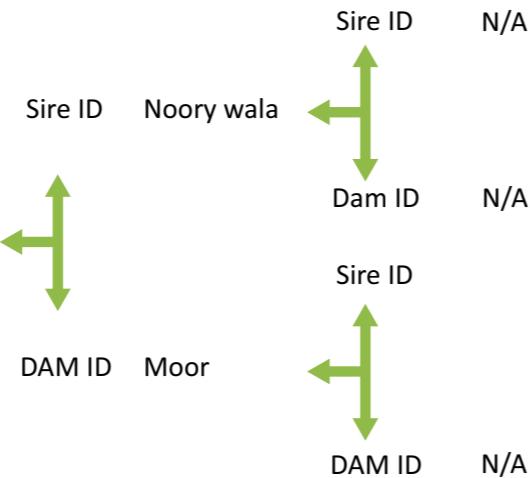

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body weight
* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

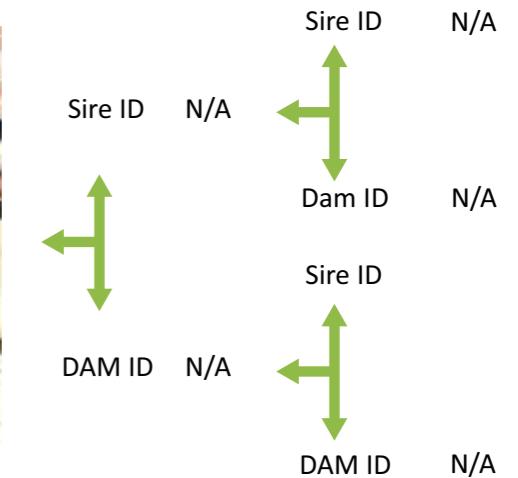

Housing System

Excellent	Loose stall, Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area	
* Good	Loose stall, proper feeding manger+Once a day access to pound+resting area+excellent ventilation	
Above average	Loose stall, proper feeding manger+resting area+good ventilation	
Average	Tie stall+proper feeding manger+Resting area+good ventilation	
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
42	36	41	5	124

Star Marked And changed colour is current practice of farmer from below Table

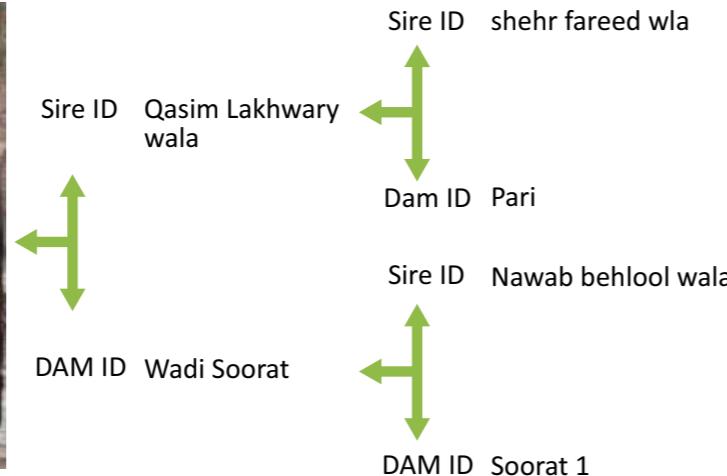

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body weight
* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

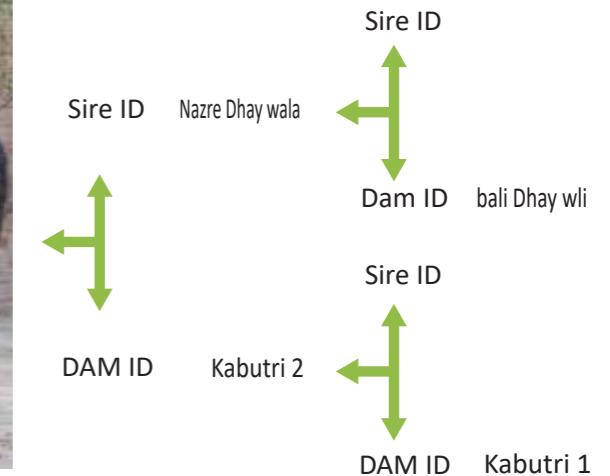

Housing System

Excellent	Loose stall, Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day access to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
50	25	42	2	119

Star Marked And changed colour is current practice of farmer from below Table

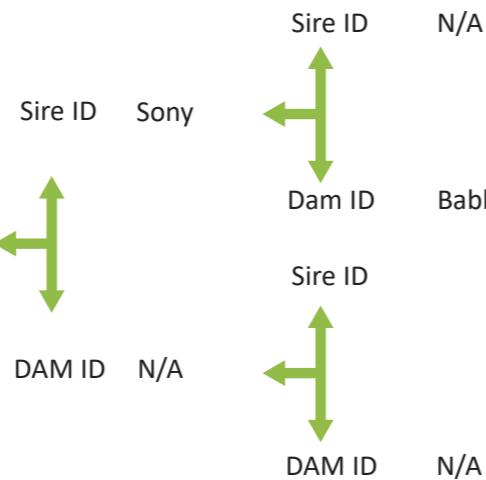

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

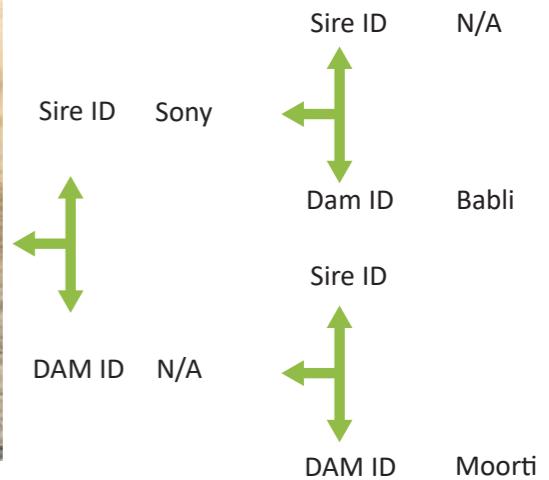

Housing System

Excellent	Loose stall, Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area	
* Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation	
Above average	Loose stall, proper feeding manger+resting area+good ventilation	
Average	Tie stall+proper feeding manger+Resting area+good ventilation	
Poor	Tie stall+poor ventilation+ No resting area

* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall, Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day access to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
45	15	21	1	83

Star Marked And changed colour is current practice of farmer from below Table

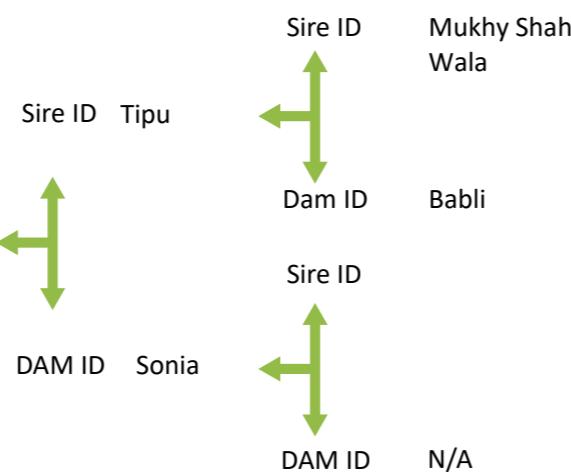

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

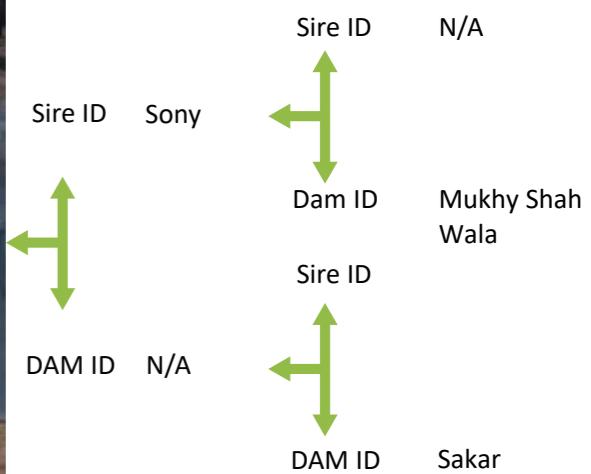

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
15	6	12	1	34

Star Marked And changed colour is current practice of farmer from below Table

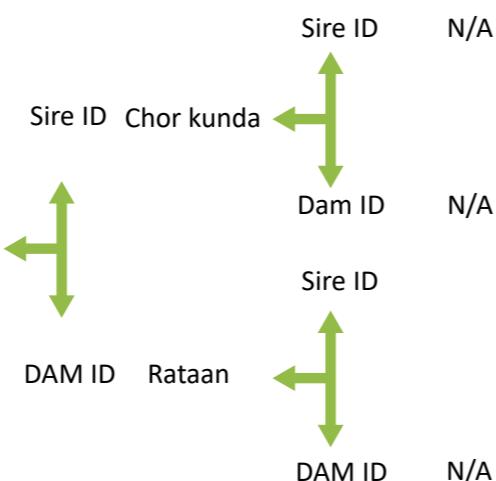

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body weight
* HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

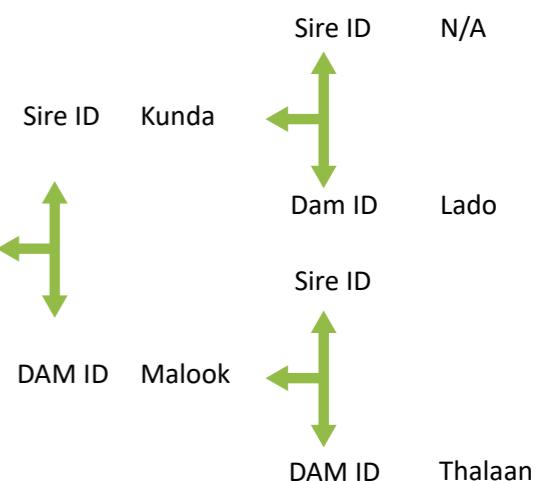

Housing System

Excellent	Loose stall, Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day access to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
18	5	12	1	36

Star Marked And changed colour is current practice of farmer from below Table

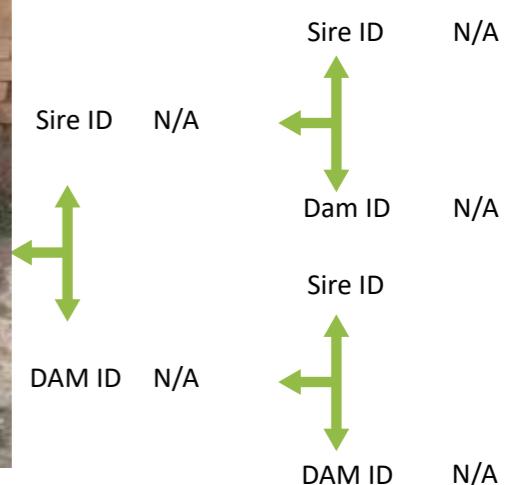

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
* LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
* Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
35	14	16	1	66

Star Marked And changed colour is current practice of farmer from below Table

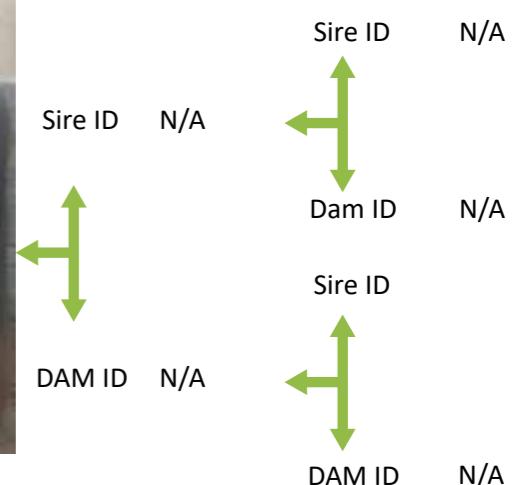

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
* MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
* Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
22	12	14	1	49

Star Marked And changed colour is current practice of farmer from below Table

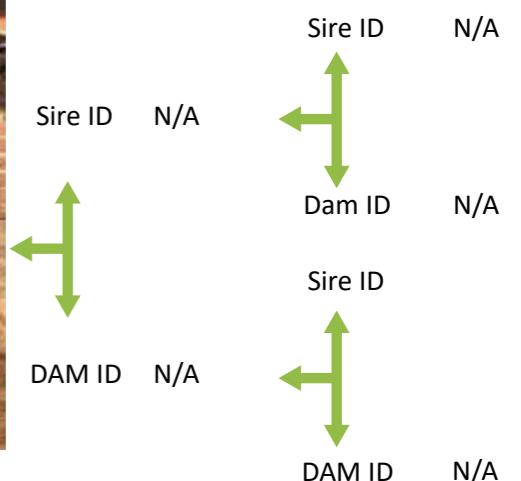

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
* LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
* Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
35	24	28	3	90

Star Marked And changed colour is current practice of farmer from below Table

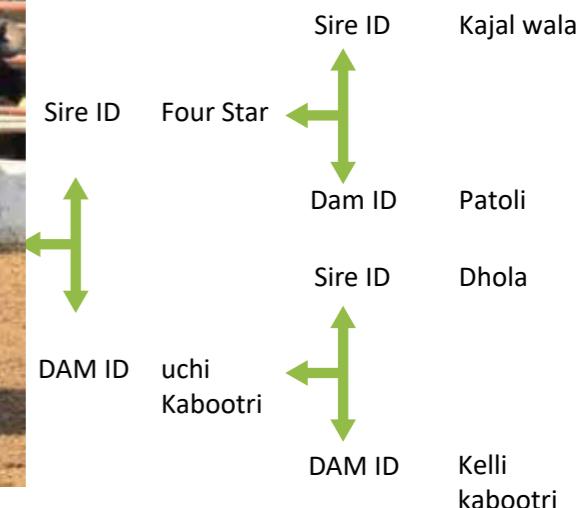

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
* MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area

Buffaloes Detail

Adults	Heifers	Calves	Bull	Total
15	16	14	2	47

Star Marked And changed colour is current practice of farmer from below Table

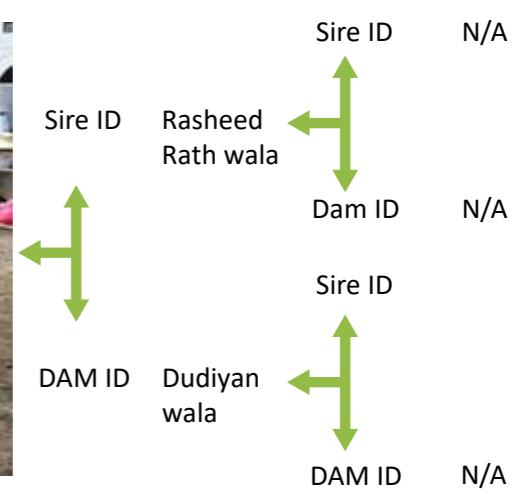

Feeding system

NFS	Necessary feeding system	Total mixed ration @3% Body wieght
HIFS	High input feeding system	Forage ad lib+ Silage/Hay+Concentrate+free water access
* MIFS	Medium input feeding system	Forage ad lib+ occasional Concentrate+free water access
LIFS	Low input feeding system	Forage ad lib+ water access on offering
PIFS	Poor input feeding system	Grazing from communal land+ Water access on offering

Housing System

Excellent	Loose stall,Proper feeding manger+Free access to pound+excellent Ventilation+Bedding in resting area
* Good	Loose stall, proper feeding manger+Once a day acess to pound+resting area+excellent ventilation
Above average	Loose stall, proper feeding manger+resting area+good ventilation
Average	Tie stall+proper feeding manger+Resting area+good ventilation
Poor	Tie stall+poor ventilation+ No resting area
